#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 22 June 2007.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

The affidavits filed on 6-22-07 under 37 CFR 1.131 are sufficient to overcome the Chen-Tung reference.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-22 and 63-70 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glenn, of record, in view of Chia et al (6,225,695). The discussion of the Glenn reference is hereby incorporated by reference from the previous actions. The reference to Chia is cited to teach the use of trenches formed in the die itself that incorporate an adhesive layer which is formed between the die and a covering element. See, for example, the FIG. 3 embodiment of Chia, where an adhesive layer (308) is formed between the semiconductor die (310) and an external covering member (304).

This reference also incorporates trenches or grooves (316) formed in the die itself. Chia also teaches that these adhesive filled grooves serve to increase mechanical strength between the components, and as such, the grooves would also serve to restrict the free flow of the adhesive material.

The this feature of the Chia reference would be properly combinable with the optical device of Glenn because both references seek to form structures that attach a covering element to a die by means of an adhesive layer. Taken together, these references teach all of the structural elements of the invention.
